Plastic Sheet Care and Cleaning

For Best Cleaning Results Use:

- An anti-static plastic cleaner or polish
- A soft cloth
- Mild soap and water

Avoid:

- Abrasive cleaners, window cleaning sprays and solvents such as acetone, gasoline and lacquer thinner.

Fine surface scratches may be hidden by applying automotive and plastics polish.

Cutting Instructions for Plastic Sheets

Tools needed:
Gloves, safety glasses, tape measure, clamps straight edge and Plastic Cutting Knife

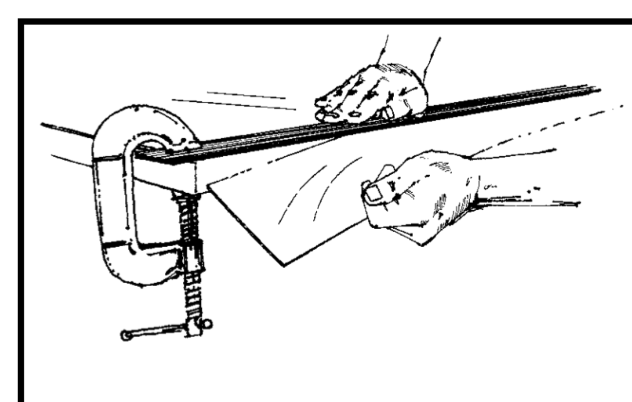

Herramientas necesarias:
Cinta métrica, abrazaderas, borde recto y cuchilla para marcar plástico

Step 1: Measure & Score

Measure, clamp straight edge, draw cutting knife across plastic. Repeat scoring until 1/3 through.

Paso 1: Medición y marcado
Mida, coloque una abrazadera para sujetar el borde recto y pase el cuchillo para marcar a largo del plastico. Repita el proceso de marcado hasta penetrar un 1/3 del grosor.

Step 2: Snap Off

Hang scrap portion over edge of workbench, apply gentle downward pressure to break off.

Paso 2: Desprendimiento
Deja que la parte que va a desechar cuelgue sobre el borde de la mesa de trabajo y aplique presión leve hacia abajo para desprenderla.
